

FRAMEWORK PURPOSE:

Runtime Governance evaluates whether a specific execution event remains a legitimate exercise of enterprise authority.

1. THE EVALUATION OBJECT

What is being evaluated?

EXECUTION EVENT

Runtime Governance evaluates a specific execution event.

PRINCIPAL

Who currently holds authority

DELEGATION

Through what chain was authority conveyed

ACTION

What specific operation is being performed

TARGET

Which resource, system, or data is affected

CONTEXT

Do the current conditions justify execution

INTENT

Does the execution remain consistent with the objective

PROVENANCE

What is the data and authority lineage

2. THE FIVE CONDITIONS OF EXECUTION LEGITIMACY

How legitimacy is determined

ALL FIVE CONDITIONS MUST BE SATISFIED

at the moment execution occurs.
Each condition is independently
required—and may fail independently.

3. LEGITIMACY DETERMINATION

What the evaluation produces

CONDITION RESULTS

Each of the five conditions is independently evaluated.

AUTHORITY
VALIDITY

ILLEGITIMATE
EXECUTION

GOVERNANCE EVIDENCE

How legitimacy is established and recorded

LEGITIMACY
DETERMINATION

The runtime evaluation
of the five conditions.

GOVERNANCE
EVIDENCE

The reasoning and proof
supporting the determination.

DECISION
RECEIPT

The atomic record
of the governance
decision.

LOGS RECORD EVENTS.

GOVERNANCE EVIDENCE RECORDS DECISIONS.

GOVERNANCE LAW

SECURITY CAN BE CORRECT.

AUTHORITY CAN BE VALID.

EXECUTION CAN STILL BE **ILLEGITIMATE**.

RELATED RUNTIME GOVERNANCE CONCEPTS

EXECUTION EVENT

The composite object
evaluated by Runtime
Governance.

DELEGATION CHAIN

The ordered sequence
through which authority
is conveyed.

AUTHORITY DRIFT

The divergence between
authority held and what
current circumstances
justify.

GOVERNANCE EVIDENCE

The reasoning and
artifacts supporting a
legitimacy determination.

DECISION RECEIPT

The atomic evidence
record of a governance
evaluation.
