

RUNTIME ADMISSIBILITY

Evaluating whether execution should proceed at the
moment it is requested

AUTHORITY DOES NOT GUARANTEE ADMISSIBILITY

Authority may exist.
Execution may remain possible.
Runtime conditions may have changed.
Runtime Admissibility determines whether
execution should proceed.

AUTHORITY DOES NOT GUARANTEE ADMISSIBILITY

Authority establishes possibility. Runtime Admissibility determines whether execution should proceed.

THE FINAL GOVERNANCE DECISION

Traditional Governance asks
Can this execute?
Runtime Governance asks
Should this execute right now?

EXECUTION IS A GOVERNANCE EVENT

Runtime Governance evaluates execution as a composite governance event.

Accountability Requires Runtime Admissibility

Distributed systems execute from many local authority states.
The enterprise experiences one consequence.

WHEN RUNTIME ADMISSIBILITY FAILS

Authority may remain valid.

Runtime conditions no longer permit execution.

Execution is refused.

GOVERNANCE LAW 048

AUTHORITY ESTABLISHES POSSIBILITY.

RUNTIME ADMISSIBILITY DETERMINES WHETHER EXECUTION MAY PROCEED.

Runtime Governance evaluates admissibility immediately before consequence is created.
